

FOAM BALING PRESS

About this product

The H75DL2500L foam baling press features triple compacting action and a large feed opening, allowing for the fast and safe loading of voluminous and expansive materials such as polyurethane foam. The press applies its full 75-ton compressing force against the heavy-duty hydraulic end-door to create compact and well-shaped bales. The foam press features a frame, press plate, and pressing door for easy horizontal and vertical tying.

Fast loading

Compact bales

Easy tying

Specifications

- Robust design
- Triple compacting action
- Pressing forces up to 75T
- Feed opening dimensions: 1500 mm x 2500 mm x 1100 mm
