

SINGLE BOX PRESS

The V-SKR is a single box fiber press. This machine is typically used for applications with low to medium capacity. This press handles about 3 to 14 bales per hour. We use a loader for bigger capacity. In most cases, the machine is fed by a conveyor in conjunction with air transportation. As an option, the machine can be fitted with automatic wrapping, strapping, and bale evacuation. In most cases, the machine is fed by a conveyor in conjunction with air transportation. As an option, the machine can be fitted with automatic wrapping, strapping, and bale evacuation.

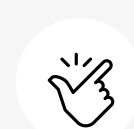

The V-SKR single box press offers simplicity, minimal maintenance, and versatile configurations. With options like automatic strapping, wrapping, and bale evacuation, it optimizes your fiber baling process.

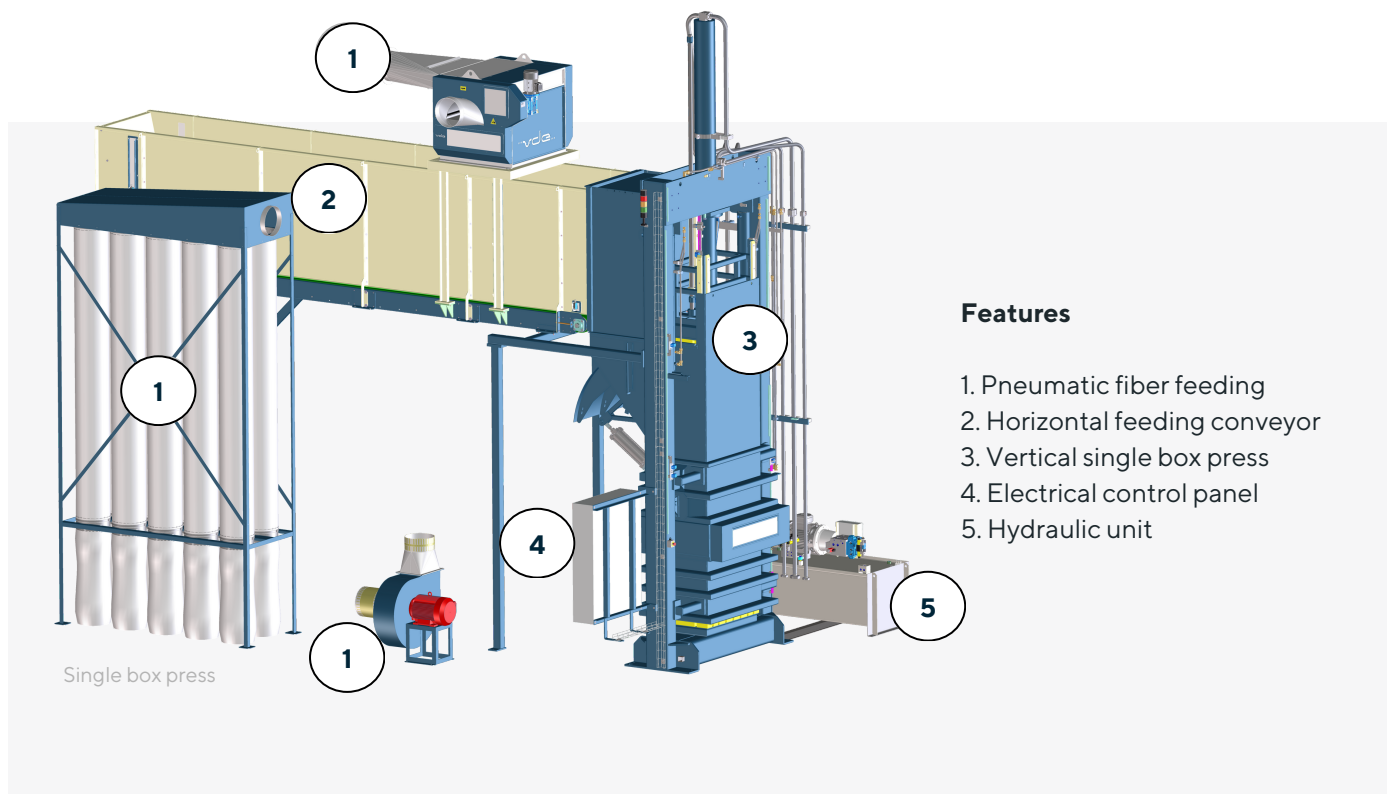

Reduced maintenance

Versatile configurations

Easy to operate

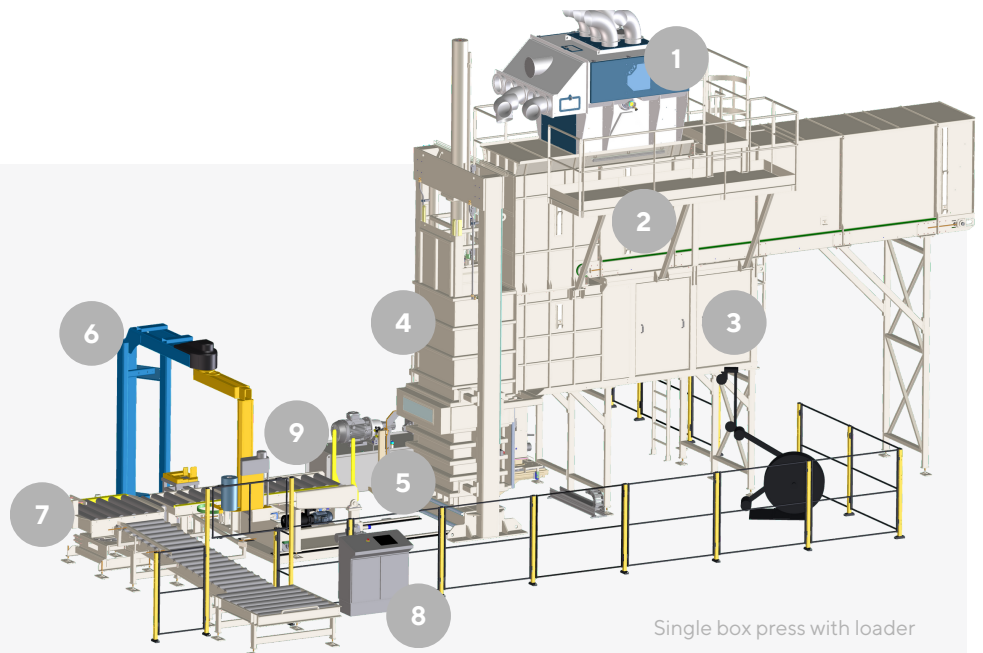

Technical specifications

- Pressing forces : 25T – 40T – 75T – 120T – 200T
- Capacity : 800 to 3.000 kg/h, depending on the material used
- Motor power: from 11 to 75 kW
- # of straps: 6 or 7

Features

1. Pneumatic fiber feeding
2. Horizontal feeding belt
3. Loader
4. Vertical single box press
5. Automatic strapping unit
6. Stretch film wrapper
7. Bale evacuation
8. Operator panel
9. Hydraulic unit
