

Hypersort®

AI-powered pricing and item tracking for used textiles

**Price consistently. Increase speed.
Gain full traceability.**

Hypersort® is Valvan's AI-powered solution for pricing and item tracking in used textiles. It enables consistent pricing across operators and locations, provides real-time performance insights, and delivers item-level traceability through QR codes.

WHAT YOU GET

- **Consistent pricing across operators and locations**
- **Real-time analytics and performance dashboards**
- **Item-level tracking through QR codes**

One Valvan technology. Two powerful solutions.

1 Software solution: Hypersort Connect

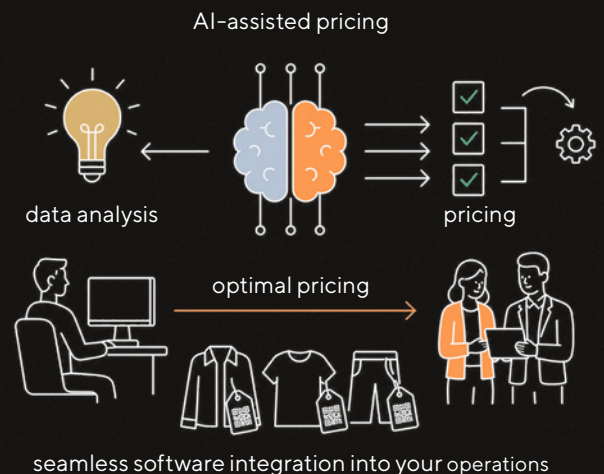

How does it work?

The pricer enters data through an intuitive interface. AI analyzes the item information and provides a pricing based on your pricing structure. A QR code label can be printed and attached, linking the item to its pricing data and operator input.

All data is stored centrally in your system database and made available through the reporting dashboard.

Why choose our software solution?

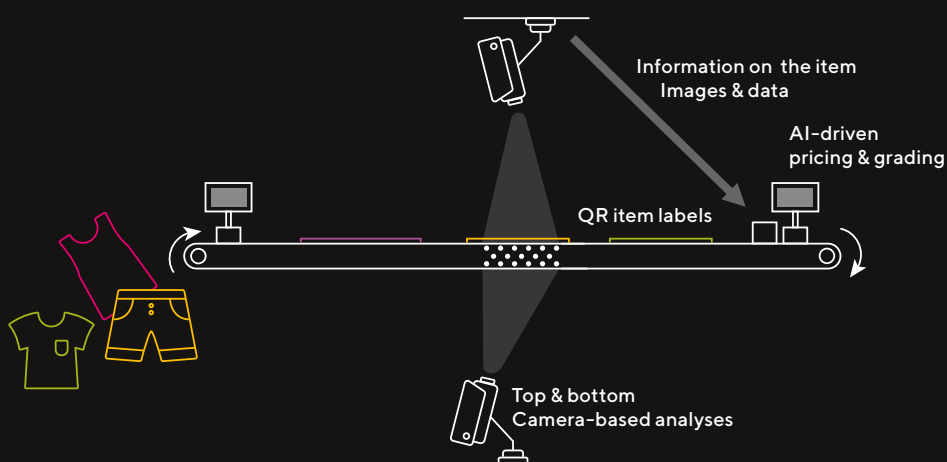

- Excellent value for money
- Supports and strengthens human decision-making
- Seamless integration into your operations
- Minimize revenue loss due to underpricing
- Save time with faster brand selection
- Continuously improve pricing based on data insights

2 Hypersort

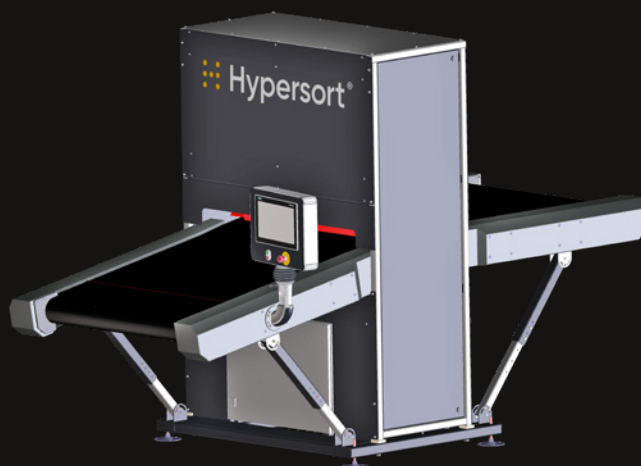

How does it work?

Items are placed on the conveyor while data is entered on the touchscreen. The system automatically captures visual information and images. The AI-driven algorithm identifies categories, colors, and grading, resulting in accurate pricing based on your pricing model. All data is stored centrally in the system database and made available through the reporting dashboard.

Why choose our fully integrated sorting system?

- Maximum consistency
- Higher throughput
- You have full ownership and control over your data
- Minimize revenue loss due to underpricing
- Increase speed through faster brand selection, automatic category recognition, and automated grading
- Optimize pricing performance through richer operational data

Your data. Your control.

Ready to price smarter, faster, and more consistently?
